

VISIONET

Actuarial Automation Solution

**Building a future-ready
operating model for
actuarial processes driving**

SPEED, EFFICIENCY, AND PRODUCTIVITY

Inefficient actuarial processes inundated with a plethora of legacy systems, spreadsheets, and vendor dependency – all underpin an urgency to rethink your actuarial processes.

Actuarial Automation

Covers It All

It is an API-enabled automation solution with a headless architecture that streamlines the actuarial processes — empowering actuaries to design, deploy, and execute complex model runs.

Actuarial Automation | Why Now

Increased customer expectations

Competition from Insurance Tech

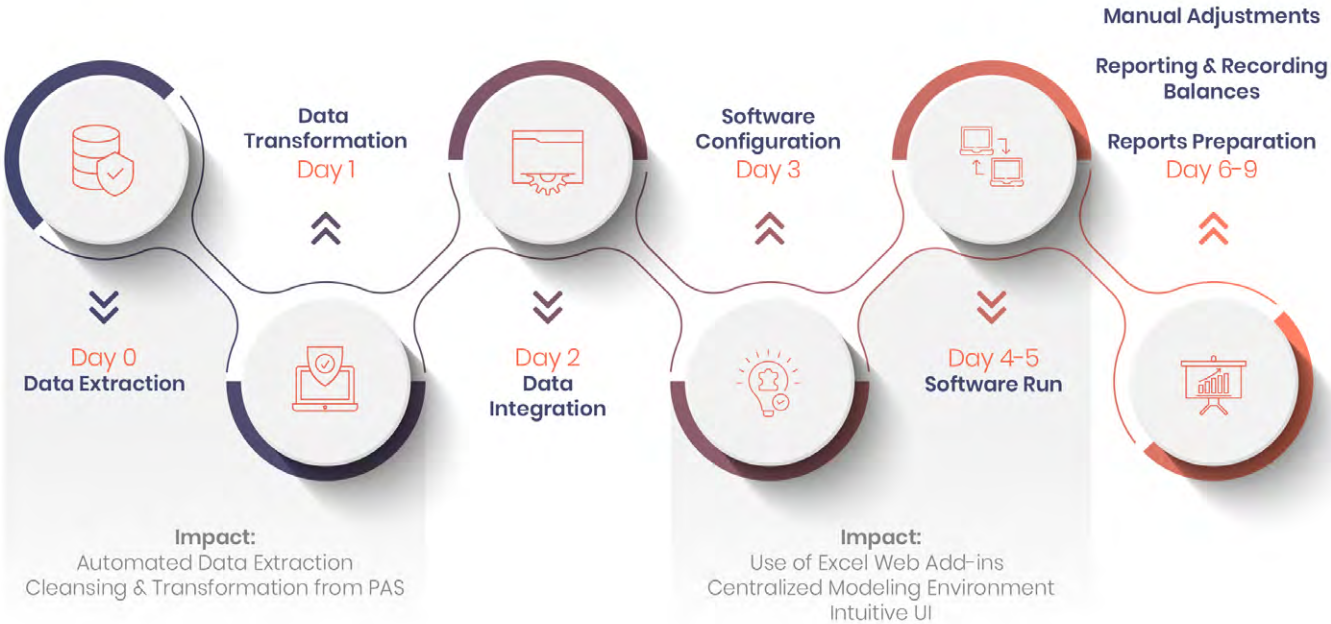

High overhead and operations costs

Renewed focus on risk management

Increase **actuarial efficiency** by empowering them for high-impact initiatives and automating the routine-based manual tasks across the actuarial processes.

Accelerating the Valuation Process

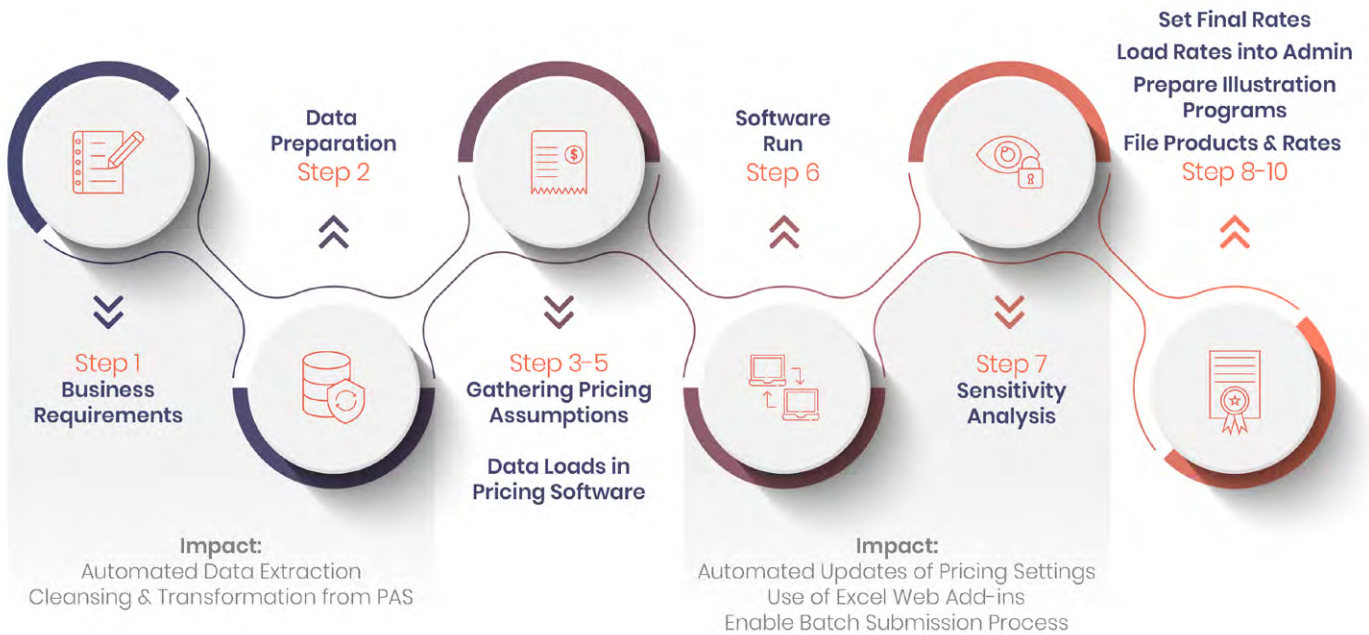

Outcomes Delivered

Reduction in time & effort

- 30% in data preparation
- Shrinking closing cycle up to 24 hours
- 40% in model runs
- Reducing dependency on vendor environment

Accelerating the Pricing Process

Outcomes Delivered

Reduction in time & effort

• 30% in data preparation

• 50% in pricing model runs

• Pricing run processes up to 72 hours

Visionet's Actuarial Automation Solution

Our solution empowers Insurance leaders in automating the routine-based manual tasks so they can accelerate time to market while shrinking the closing cycle time and reducing operational costs.

1 
Optimize and automate workflows
Eliminate manual & repetitive tasks

2 
Seamlessly process large data sets
Automatically extract, cleanse, and transform

3 
Centralized modeling environment
Consolidation of multiple systems and tools

Excel your Actuarial Automation with **Visionet**
