

# Accel - Visionet's Actuarial Utilities Platform

[www.visionet.com](http://www.visionet.com)

# Why Actuarial automation

Increased customer expectations for personalized solutions

Dominant usage of legacy systems and spreadsheets

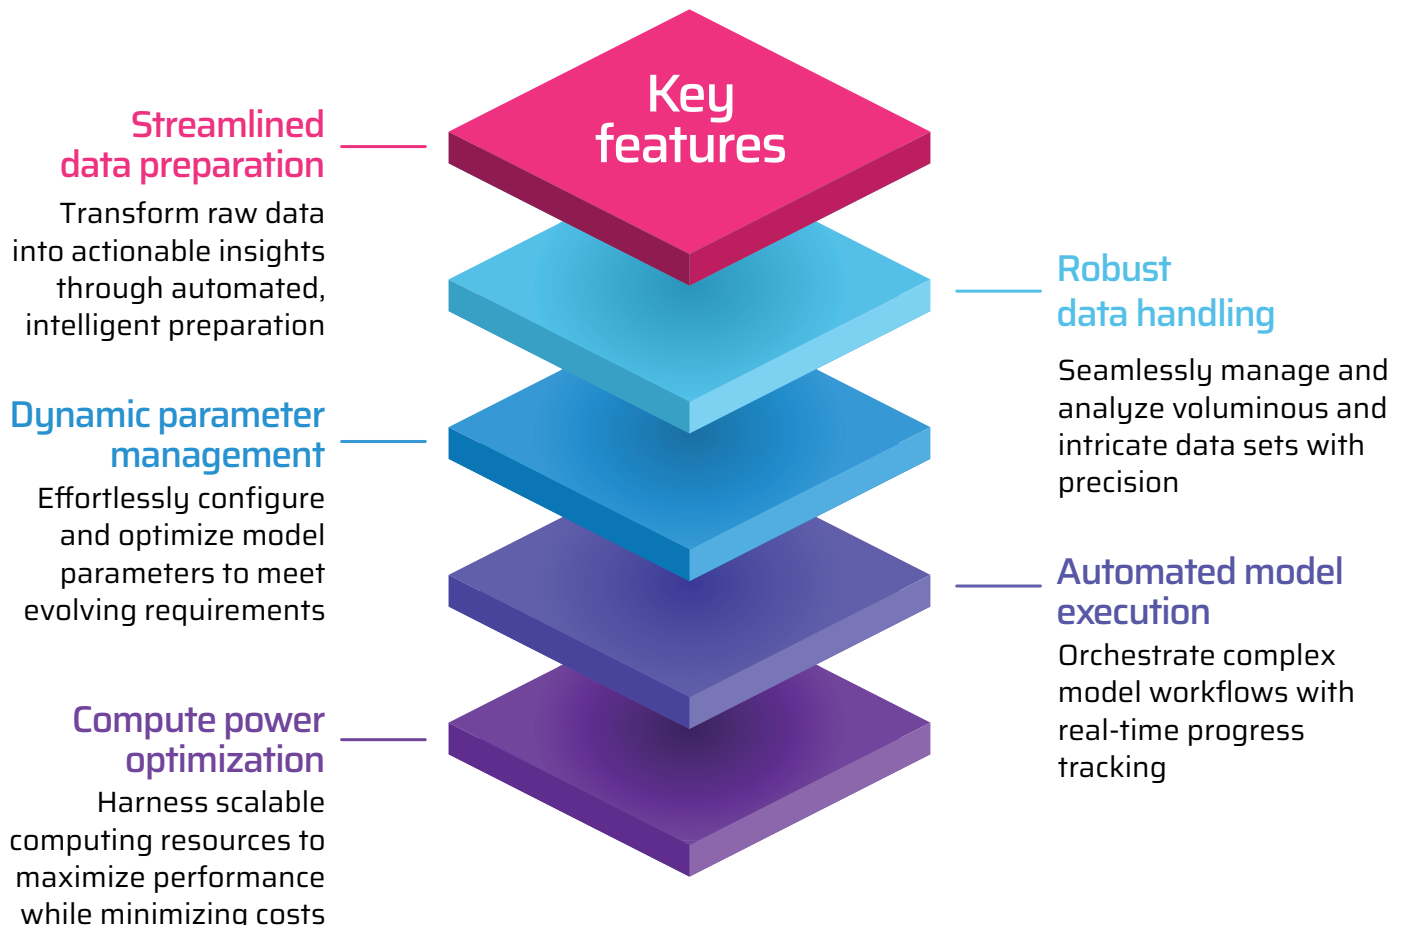

High consultation and actuarial operation costs

Renewed focus on risk management

## Redefining efficiency through intelligent automation

Accel - Visionet's Actuarial Utilities Platform is a transformative solution, integrates automation at every stage to alleviate the burden of repetitive tasks. By enabling actuaries to focus on high-value strategic endeavors, this platform drives agility, precision, and unparalleled operational efficiency. With future-ready operating models, Accel improves productivity, reduces operational bottlenecks, and delivers measurable cost and time savings.

# Key benefits

**Accelerated turnaround**  
Drastically reduce valuation cycle times with streamlined processes.

**Cost efficiency**  
Realize significant savings through automation and resource optimization.

**Enhanced operational agility**  
Redirect talent from routine tasks to critical decision-making initiatives.

**Seamless adoption**  
An intuitive interface and simplified workflows ensure rapid onboarding and integration

## Proven results

Accel delivers quantifiable advantages that reshape operational benchmarks:

**30% reduction**

in data preparation effort

Closing cycle condensed by up to

**24 hours**

**40-50% decrease**

in model execution durations

**50% efficiency gains**

in valuation and pricing model operations

These results translate into transformative productivity gains and a decisive competitive advantage.
