AI-driven claims automation: Faster, smarter, and more efficient

Key challenges in claims processing

Slow claims processing leads to customer dissatisfaction

High operational costs from manual handling and inefficiencies

Risk of errors due to inconsistent decision-making

Fraudulent claims cause financial losses and expose vulnerabilities

Complex negotiation processes delay settlements and increase costs

The solution: Claims Assist by Visionet

An AI-driven assistant designed to revolutionize claims handling—making the process faster, more accurate, and less costly.

Core features

Initial claim analysis

Rapidly assesses claim validity and severity to prioritize cases.

Automated filing & adjusting

Reduces manual work by intelligently extracting data and automating workflows.

Negotiation assistance

Provides AI-driven insights for fairer, faster settlements.

Fraud detection

Proactively identifies suspicious patterns to minimize exposure and risk.

Business impact

Faster claims resolution

Speed up claims cycle time, delivering an enhanced customer experience.

Reduced operational costs

Automation reduces administrative burden, saving on resources.

Improved accuracy

AI consistency ensures fewer errors and a more reliable process.

Stronger fraud prevention

Detect fraudulent claims early, safeguarding business profitability.

Real-world impact

"A leading P&C insurer automated claims intake, adjusting, and negotiation with Claims Assist, cutting processing time by 35% and improving accuracy."
